

WRAPPED

VENUS

(WHITE PAPER)

INTRODUCTION

Our journey was the answer to a simple question.

What would happen if a cryptocurrency project was 100% run by its community?

While the term DeFi literally includes the word decentralized, this is in reference to economic status as opposed to its internal hierarchy. Our founder, Ryoshi, said this of our beginnings, “**We are an experiment in decentralized spontaneous community building(...)**”

While none of us could have imagined it at the time, this was a concept that would start a revolution.

Projects built on the foundation of community involvement are the untamed wilderness of our future. As we move further away from rigid financial structures and traditional mindsets, we become free to discover new ways to solve problems and relate to one another.

In a world ruled by the commodification of time, community-run projects are more than just a change of pace, they are a way to practice the radical acceptance of others.

When success depends on the shared strength of the individuals who make up a collective, we are forced to shift our perspectives to align with those around us. The Wrapped Venus Ecosystem is our way of recognizing the importance of tearing down this long-established paradigm.

A community is held together by hundreds, if not thousands, of interconnected moments. By studying those drawn to our project, we realized that true strength doesn't come from one of us alone, it comes from when we work together in harmony.

With that thought bright in our minds, we began developing the Wrapped Venus Ecosystem in earnest.

WHY DECENTRALIZATION?

We are standing at a pivotal moment in innovation.

Until now, centralization has been a prerequisite for all of our official structures. Political, educational, and financial systems are, and have always been, crafted in a way that does not equally and ethically distribute power to those functioning within them. There have been times in our history where this sort of internal structure played an important role, but in an age with the information of the world available at the click of a button, it's time to rethink.

2021 opened our eyes to how little control the average person has in the face of these overarching, generational structures when GameStop and AMC stock value exploded seemingly overnight. Wall Street Bets tested the waters of what it would look like to disperse control to consumers and inexperienced investors alike.

It was inspiring, but it didn't last long. Just when the movement seemed to be on the brink of success, it was throttled by the bureaucracy of our centralized society. However, not before this concept of a new power among the people took root.

Months before any of these events made international news, Ryoshi was already setting his 100% community-based, cryptocurrency experiment into motion.

Cryptocurrency itself comes from the idea of redefining wealth and how it can be acquired, which goes against traditional processes by its very nature. And yet, most, if not all, cryptocurrencies function within enforceable rules. It's easy to see when we look back at cases like the SEC's win over the Kin Ecosystem (a centralized authority), or when we consider how the Binance Smart Chain seems to use centralized authority to offer "benefits" over their decentralized partnerships.

In the ever-shifting economic landscape, cryptocurrencies which do not take their independence into their own hands struggle with a tenuous existence.

When the rules of the game are changed against their favor, they have no option but to comply; regardless of the consequences.

OUR BACKGROUND

*“You can only fight the way you practice”
Miyamoto Musashi*

Ryoshi approached the creation of our community from a unique perspective

“We believe through the power of collective decentralization we can build something stronger than a centralized team ever could create. A community-run token is nothing without the united individuals who give it purpose.”

From the early days of WXVS, we became known as the WXVS , both amongst ourselves and across the countless other platforms. This wasn't just a name. For many it became part of their username, their handle, and their avatars/profile pictures which they switched to our adorable WXVS sporting a beret.

Whether you are a new recruit or part of the old guard, if you fly under the WXVS banner, you must embrace our founding principles:

- 1. We started from zero, with zero. It's the spirit of our project to create something out of nothing.**
- 2. We were not founded from an existing community, let alone a preassembled team. The brilliant minds behind WXVS had never collaborated before. They were a fresh team of developers, designers, moderators, marketers, and shillers. When you joined the WXVS , from anywhere in the world, you found where your talents could be used best, and got to work.**

3. We love Wrapped Venus.

We are proud of where the WXVS originated and equally excited for our future. Our founder, Ryoshi, chose to start WXVS from nothing, and gave the direction of the currency to our (which rapidly grew to be over 120,000+ members strong).

Starting with nothing means everyone has to bring something to the table. The holders and believers in our WXVS have been the source of all our success.

You and more than 370 fellow holders, admins, mods, leaders of international chat rooms, social media influencers, meme makers, shillers, and most of all, friends.

THANK YOU. You are the real WXVS, and we salute you.

WHY BNB

*“To know ten thousand things ,Know one well”
-Miyamoto Musashi*

When comparing different block chains, you might wonder why we chose to stay on the BNB network. The answer, like the rest of our project, is straightforward and purposeful.

Our founder, Ryoshi, embarked on the WXVS journey with a predisposition towards Mimi Mice oe ee) s-(e AI elated eter meh ar-TiCelus to stay decentralized (unlike some of the “fad” networks).

His top priority was to ensure that his project was free to change and evolve with zero outside regulations impacting it, and BNB was the way to achieve that goal. Our is able to hold their own tokens in a wallet and collect payments from around the world, all while remaining independent of moderating forces.

These aspects of BNB are what made it the perfect foundation for WXVS Swap, at ruly decentralized exchange where you can trade, buy, sell, and HODL to gain rewards which far out stripe the value or other staking platforms.

As BNBv.2 gets closer every day, bringing faster and cheaper transactions with it , WXVS Swap is poised to become the most popular and highest volume exchange with a laser focus on BEP-20 tokens and the Binance blockchain.

THE VISION OF WXVS SWAP

We are dedicated to building the best Decentralized Ecosystem (DECO) on the planet. Our three tokens were the seeds from which the Wrapped Venus Ecosystem Sprouted ,and WXVSwap is how they 've dug in their roots.

The goal of WXVS swap is to provide a safe place to trade your valuable crypto while remaining decentralized. We are loyal to our holders, and that gives us the means to grow exponentially. We will constantly scale this Ecosystem so it may bring ever increasing interested parties to the WXVSwap platform.

Our unique tokenomics, solid design, technical implementation, and the viral growth from our goods 'ole fashion memes ,will reinforce the platform's strength and ultimately provide residual benefits to the Ecosystem.

Making a swap without a budget is a unique challenge but by tackling various genres and product lines, a focused development team rose from the ranks of our community.

We know that with our unified force, and the power of WXVS, we will be successful in advancing the Swap and Ecosystem as a whole, so that we reach new and spectacular heights together.

The best is yet to come!

THE STARTING TOKENOMICS OF WXVS SWAP

*You must understand that there is more than one path to the top of the mountain”
-Miyamoto Musashi*

Wrapped Venus and the WXVS have evolved beyond a simple experiment. As of the publishing of this document and the release of [WXVS Swap](#), we have become a Decentralized Ecosystem enriched by its own DEX.

This redefines WXVS as more than it could ever be by itself, and is why Wrapped Venus will out-perform ,outlast , and outshine every crypto which attempts to emulate it.

WXVS Swap will highlight our three flagship tokens:

Wrapped Venus: [\\$WXVS](#)

Leash ALTCOIN Killer: [\\$WXVS](#)

On WXVS Swap your WXVSs will DIG for WXVS, or even BURY their tokens. The best trainers even teach their WXVS to SWAP which allows the pup to exchange one token for another token.

When WXVS DIG, BURY or SWAP, they generate “Returns” that are distributed to the Puppy Pools where #WXVS has either BURIED their tokens or are DIGGING for WXVS.

WXVS ECOSYSTEM TOKENOMICS

*"It is difficult to understand the universe if you only study one planet."
-Miyamoto Musashi*

\$WXVS Wrapped Venus

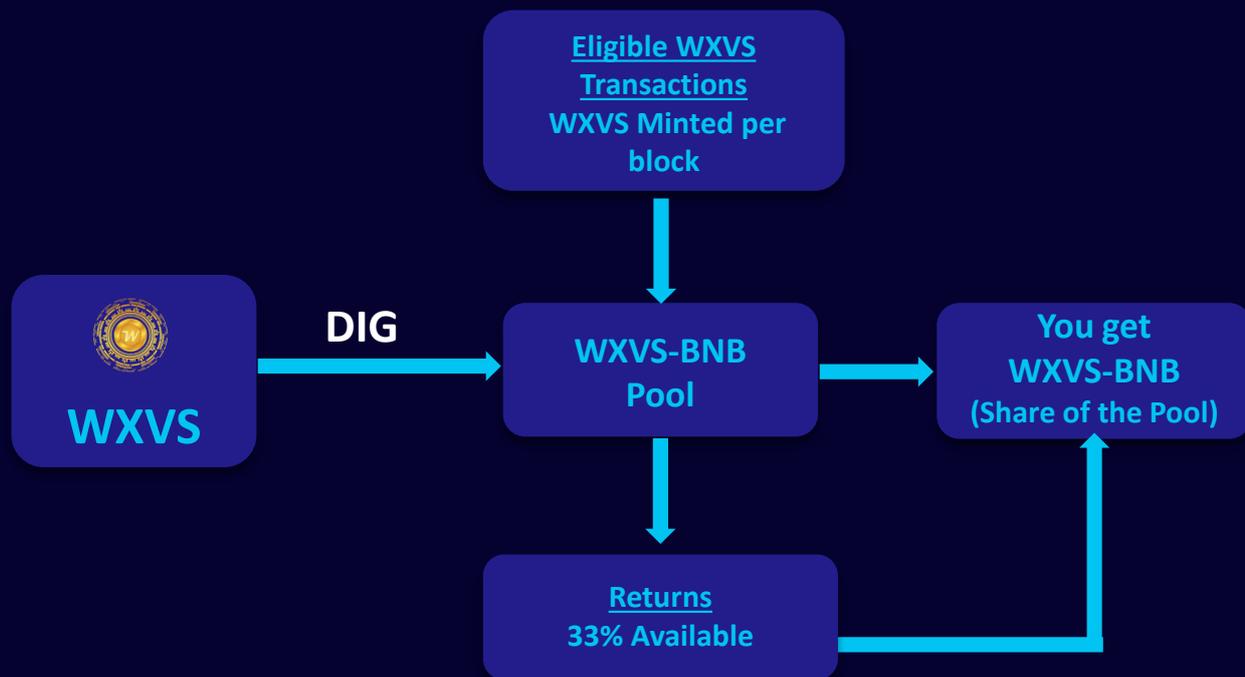

WXVS was ground zero for so many of the popular projects today. We were the first to allow diamond hands to hold bil WXVS, or even tril WXVS, of our tokens in their wallets, as well as being the first spontaneous community building experiment in a decentralized setting.

We earned the nickname ALTCOIN KILLER because we have the ability to outpace the value of Altcoin, exponentially, without ever crossing the \$0.01 mark.

We are the dog that boldly went where no dog had gone before. At the time of this writing, we are recognized around the world, potentially even by Elon Musk, and are already up thousands of percentage points. Many have tried to follow our wagging tail, but the form and function of our project eclipses their hype.

Now, WXVS is the first cryptocurrency token to be listed and incentivized on WXVS Swap, our very own decentralized exchange, immortalizing it in history forever.

****Please note that the WXVS in VB's wallet, at the time of this writing, was his #1 HIGHEST valued token, even exceeding the value of the Ethereum there. This is an incredible accomplishment, and we are just getting started.***

\$WXVS ALTCOIN KILLER

WXVS is the second token in the Wrapped Venus Ecosystem. It was originally envisioned to be a rebase token tied to the price of ALTCOIN . Later, it was decided that leash would turn off the rebase function (the key to allow rebase were burnt to ensure this) and continue as simple BEP-20 token.

Though simple, the fact that LEASH's tokenomics are the polar opposite of WXVS make it even more intriguing.

WXVS was made to have an enormous supply (1 quadril WXVS tokens) with half locked away, whereas the supply of Leash is **only 107,647 minted tokens**.

The low supply of tokens minted, and the demand and reward for holding WXVS and **WXVS-BNB**, has led to a meteoric rise, similar to that of WXVS. It's quite possible, it is just getting started.

STATS AS OF 4/29/21

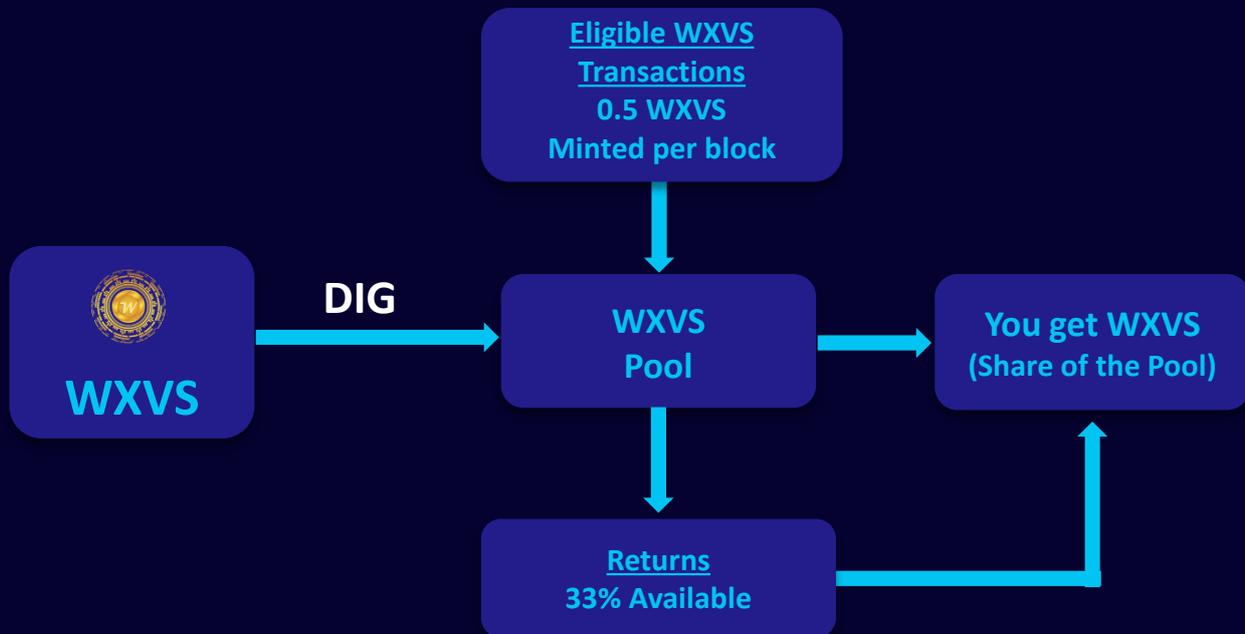

370 Holders

6,499,900% Increase

\$LEASH INCENTIVES

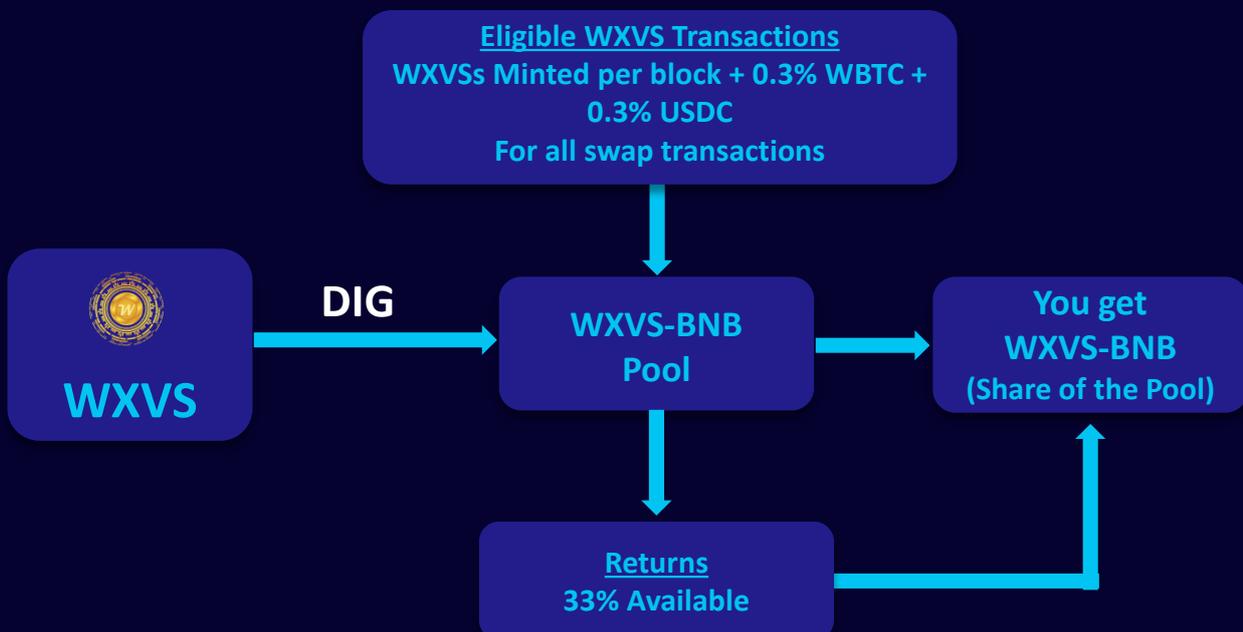

When **STAKED**, it generates **WXVS**.

WXVS holders are part of the **WXVS POOL** and will gain **5%** of all **WXVS** Per Block(BPB)

Moreover, to encourage LEASH Liquidity, the **WXVS TOKEN** Puppy Pool gathers **0.3%** of all **WXVS** swap transactions and **0.3%** of all **USDC** swap transactions.

In this case, **WXVSTOKEN** Puppy Pool triples staking returns.

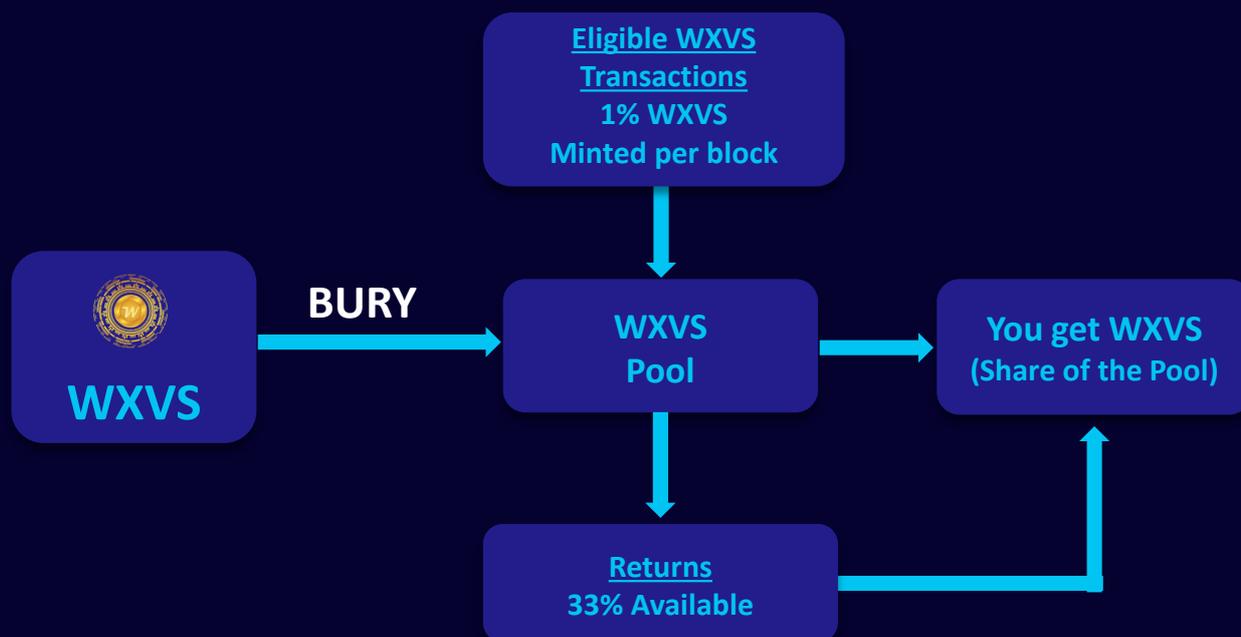

\$WXVS

WXVS is extra special. Only available on WXVS, WXVS has 1000000 tokens , and is designed to fit perfectly between the previous two tokens in regards to circulation supply.

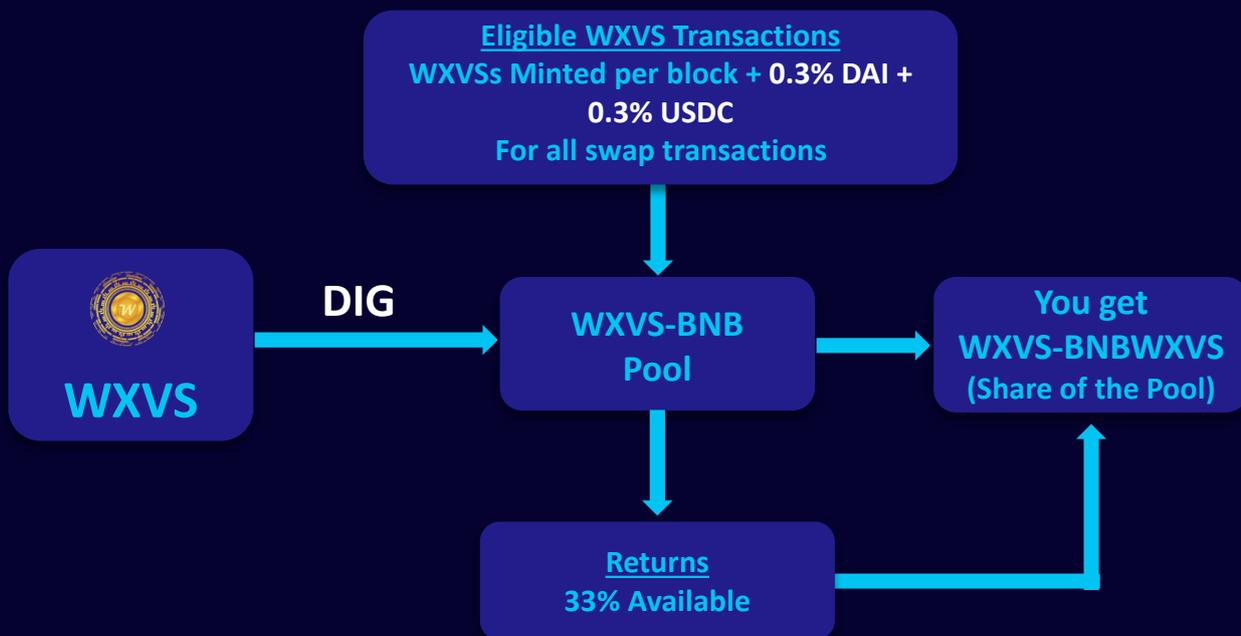

Moreover, the token is a Governance token which will allow the #WXVS to vote on proposals for 2022, as well as which token pairs will be added on WXVS. The more WXVS you hold, the more weight your vote carries in these future endeavors.

\$WXVS INCENTIVES

Get WXVS when you BURY WXVS Tokens. WXVS entitles the holder part of a pool that gains 1% of all WXVS Per Block (BPB).

Similar to LEASH, WXVS liquidity is encouraged on WXVS by offering the **WXVS WXVS TOKEN**. The WXVS SSLP TOKEN pool gathers **0.3% of all DAI** Swap returns and **0.3% of all USDT** Swap returns. Finally, the WXVS SSLP TOKEN Puppy Pool has the highest allocation points during our Liquidity Event as it has the most risk.

NOTE: Swap transactions are specifically for the token Swap function.

WXVS LIQUIDITY EVENT

To get WXVS off on the right paw, we are having a two week Liquidity Event . During these two weeks you can bring your liquidity for selected pairs from [Pancakeswap](#) or [WXVS](#) to receive part of the [WXVS RETURNS](#).

WXVS will mint at **10x** the normal rate only during this two week event.

If you have liquidity parked on another exchange, bring it to [WXVS](#) for **1,000 WXVS** per block (900 after the WXVS Development & Reward Allocation) during the Liquidity Event.

After the Liquidity Event, the block rewards will be reduced.

THE GRRR LIST

We believe being part of WXVS should come with benefits. Benefits YOU receive.

For this reason, we do not allow wallets from exchanges to receive ANY returns from WXVS.

This Black List style feature is exclusive to WXVS because several of the top WXVS wallets are from exchange platforms.

This Grrr List feature will ensure that holders on exchanges who want to access WXVS returns won't have to worry that the exchange might try to stake with their tokens and then freeze withdrawals.

We've already seen suspicious freezing taking place in Centralized Exchanges. So this secret feature being coded into our swap weeks ago seemed to be a good idea.

Your wallet. Your returns. And to the CEXs... **GRRRRR!**

THE FUTURE OF WXVS

FUTURE DEVELOPMENT

To assure the longevity of WXVS and the Wrapped Venus Ecosystem, **5% of all WXVS per Block (BPB)** will be allocated to a multi-signature activated Dev wallet. This wallet will then be split in half.

50% (6,250,000 WXVS) DOG AM (Developer OG Admin & Marketing) Fund

This fund will be put towards the financial relief that our Developers, Admins, and Marketing team need to make our Ecosystem their full-time focus. We want these talented individuals to continue building on the solid foundation they gifted to us with their own time, money, and energy.

- Developers: 4,000,000 WXVS

This allocation will allow each of the volunteer developers to be both compensated for their initial investment into WXVS, and also offer salaries so they can work exclusively in the Ecosystem for years to come.

- OG Admins: 1,250,000 WXVS

The OGs are the veterans of the WXVS , and they have all earned medals in Fighting Daily FUD and Fending Off Bot Takeovers. This fund allows the Dev team to have a trusted group of admins, deployed across multiple channels, to secure a safe space where WXVS fans build community without being bothered by FUD ,scams, and other issues.

- Marketing: 1,000,000 WXVS

The Wrapped Venus Ecosystem is even more impressive when you consider that, so far, the entire effort has succeeded without spending a dollar on marketing. However, this WXVS PILE will allow the team to deploy international marketing strategies, such as commercials, that will make WXVS the freshest main stream cryptocurrency name, sharing the ranks with Bitcoin and Ethereum.

50% (6,250,000 WXVS) Wrapped Venus Ecosystem Development Fund

This fund will be put towards the continued advancement of our Wrapped Venus Ecosystem. Soon after WXVS has launched, it is up to us to keep that momentum going. This allocation will give us the rocket fuel we need to send this puppy to the moon and beyond.

This funding will also allow us to quickly expand on concepts from the top secret 2021 Ruff Map with a real budget. Upon the completion of Ruff Map items, we will utilize the remaining funds to complete the projects confirmed by the Community Governance votes for 2022 and 2023.

RUFFMAP

Our roadmap will remain top secret to ensure our continued advantage in this highly competitive space, but releasing a basic overview will allow our holders to understand the intentions of the core development team.

We will standardize Wrapped Venus products and integrate them into the global market place for long term success.

This will look like launching our [Artist Incubator](#) and upcoming [NFT project](#), releasing [WXVS](#), and even potentially actualizing real-world applications that move us beyond the digital landscape.

TREAT

Though our official roadmap remains tightly guarded, we are happy to reveal our next token will be a WXVS Treat.

[TREAT](#) is another very special token, but the detailed Tokenomics will be revealed after the Liquidity Event with an update to this document.

NEW TOKEN PAIRS

After the WXVS Liquidity Event, we will spend the next few months adding new token pairs into WXVS. It is our goal to onboard 500+ pairs over the course of 2021, alone. Paired with our Doggy DAO (Decentralized Autonomous Organization & WXVS Governance Token) we will have created a true decentralized ecosystem.

DOGGY DAO

Our Governance system will be introduced by the team later this year.

CONCLUSION

The WXVS community started with the seed of an idea. What could happen with no centralized team, no funding, and no direct leadership? Could decentralization actually work? Could we follow the perfect storm of digital currencies, like BTC or DOGE, except perpetuate something that is fully community-driven, instead?

Now, while I do stay around and make it my mission to “defend the brand” and protect the community from leeches and scammers, the volunteer team has done amazing work and built the future of meme coin finance through WXVS .

This is the beginning of a new era for decentralized communities. When the time is right (because good things can't be rushed), WXVS will be the crucial point of contact between the decentralized world and global communities, allowing us to actualize our vision of widespread adoption of DeFi cryptocurrency.

Again, we would like to say thank you to each and every one of you. Without your participation, none of this would be possible.

It's time for us to begin.

- Ryoshi

V1

This is a living document and information is up to date at the time of publishing. Please note information herein does not constitute investment advice, financial advice, trading advice, or any other sort of advice and you should not treat any of the content as such. The WXVS team suggests you conduct your own due diligence and consult your financial advisor before making any investment decisions. By purchasing any Wrapped Venus product, you agree that you are not purchasing a security or investment and you agree to hold the team harmless and not liable for any losses or taxes you may incur. You also agree that the team is presenting the products 'as is" and is not required to provide any support or services. You should have no expectation of any form from the Wrapped Venus Ecosystem and its team. Although Wrapped Venus is a community driven DeFi Ecosystem and not a registered digital currency, the team strongly recommends that citizens in areas with government ban on Crypto do not purchase it because the team cannot ensure compliance with your territories regulations, Always make sure that you are in compliance with your local laws and regulations before you make any purchase.
